

New model WD-7C for LED series is finally here!

WD-7C Dedicated equipment of Wonder Flight Pro series (The successor model of WD-1)

WD-7C, a release device that is a Wonder Flight Pro series, can be used in various facilities such as hotel banquet rooms, live houses, theme park, theaters, arenas, and domes.

< feature >

- WD-7C does not miss the timing of production! As soon as the WD-7C is in operation, the release of Flits will begin.
- Flits (up to 100 sheets) stored in the WD-7C are released at almost regular intervals until the end.
- The total time until all flits are sent can be adjusted within a certain range.

< new function >

- Automatic off timer to prevent motor overheating due to forgetting to switch off.
- A function to make Flits' new series "Meteor LED" emit light just before it is sent out.

Setting

Setting is very easy! All you need to do is align the Flits into the "WD-7C".

Open the top lid

Stack Flits into pieces that are easy to pick up

Align the edges of Flits while stacking
(Up to 100 sheets can be stored)

Finally, put the star weight attached to the WD-7C and close the lid of the device.

Accessory

WD-7C dedicated carry case (2 storage)

Hanger

Wire to prevent fall
